

DEBATE :
Fashion
contributes
to society

AGAINST

1.Many irresponsible young people are crazy about fashion.

2.Fashion appeals only to those who don't have a real sense of beauty.

3.Money should be invested in things other than jewelry. Jewelry is a very poor investment.

4.People often look odd with the so-called fashionable hairstyles, make-up and dresses.

5.Most men don't care for excessive make-up often over used by many women.

6.Fashion goes like this: one year, one thing, next year, the reverse.

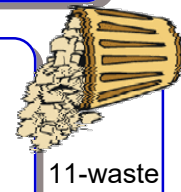

8.People are so vain that they are afraid of being seen in old-fashioned clothes.

9.We must bear this in mind: Don't judge a person by their appearance.

10.People, especially fashion followers, are blackmailed by fashion designers and stores.

11.Changing fashions is a deliberate creation of waste because one will have to discard a lot of clothes in order to follow fashions.

12.Fashion designers are not interested in important things like warmth, comfort, and durability of clothes. They are only interested in outward appearance and profits.

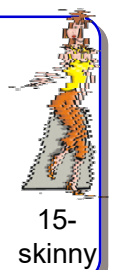

13.In order to follow fashions, people have to put up with great discomfort, such as suffering from cold in winter.

14.One's confidence does not grow from the way one is dressed, but from the inner qualities one possesses.

15.The fashion industry features very slim women as models for their clothes. Thus many young women suffer from many forms of eating disorders trying to imitate these skinny models. This causes a lot of health problems and even some deaths.

16.In order to follow fashions, people waste a lot of money.

17.Fashion causes poor people to be looked down upon without fashionable clothes.
